<p>June 14, 2022</p>	<p>Thanks for the opportunity to participate in the TAC gathering last week. The broad participation was generally a good thing, but the desired balance between an open discussion of issues of interest to participants and what the TAC facilitators indicated they were most interested in hearing about, was tested. Ultimately, for example, the Land-Use/Housing/Zoning TAC really spent most of its time on Trinity County "assets" and was not able to proceed with a directed discussion of the other two points of primary interest.</p> <p>One possible solution would be to restructure the TAC participants into two sub-groups, including (1) the more "technical" folks (County and non-County); and (2) other interest folks who are more advocacy focused. The former could be asked to provide more technical review and feedback, perhaps on preliminary administrative drafts; and the second group could be asked to comment on the revised, more polished resulting drafts, as the process proceeds.</p>
<p>June 10, 2022</p>	<p>Hello,</p> <p>I want to request that where possible, remote access to the public meetings be made available for homebound disabled & elderly residents. As a disabled and mostly homebound resident of Trinity County, it has been amazing finally being able to access and participate in local government meetings & I look forward to participating in the general plan update for Trinity County as much as possible. I'd like to be able to be on one of the committees, but I would not be able to attend in person, so any accommodations that could be made for community members such as myself would be greatly appreciated. Thank you so much for your consideration. And great work on the presentations made this week!</p>

June 8, 2022	Please be sure to take the time to drive around the county and understand the different mini-communities and their individual needs. Also, please be mindful of agricultural uses on large parcels in RR districts. It is unfair to disallow farming on a 5 or 20-acre parcel as you would on parcels with 1 acre or less. Also, please just be consistent in whatever you do. As someone working in commercial cannabis, it's difficult to navigate trinity county ordinances without inconsistent, ancient language to decipher when trying to understand appropriate land uses. Than you for doing this!
June 8, 2022	I was at workshop tonight. I am retired from UC Cooperative Extension in Trinity County. Was Small Farm advisor & did economic development for agriculture. ie Agritourism, wineries, boutique meat processing, Farmer Market promotion. Plus forest product uses - biomass, pellets, commercial firewood, etc. Would that be valuable to the TAC? Do you have someone representing that economic sector?
June 8, 2022	Suggestion for outreach- local community Facebook groups are really effective for communication in Hayfork and Hyampom. Chris Ledman runs the Hayforkers page and if she posts the updates for you it will be seen by a lot of eyes. I am not sure who runs the two Hyampom groups, but they are both used a lot. I imagine southern trinity has their own groups as well
June 8, 2022	Please come to the Weaverville Farmers Market as a pop up event! It's every Wednesday from 4-6 or 7. Hayfork also has one
June 7, 2022	Great presentation to the Board of Supervisors! I'm so excited you all are here and this is actually happening!! :) I look forward to working with each of you.
May 23, 2022	Will cannabis cultivation be considered agriculture or will cannabis be a new and distinct classification?
May 19, 2022	Where we can se the new general plan zonings?
March 6, 2022	Will all of the local community plans be updated?
February 28, 2022	Will the starting point for defining zones and land use elements of the General Plan and associated local plans be the 1989 General Plan, the current map including opt-outs, a reset or something else?
January 28, 2022	Will the general plan address unlicensed cannabis cultivation?

January 5, 2022	Can you please tell me if the General Plan workshops have been rescheduled?
October 22, 2021	Opt-outs from the cannabis program. Is there a defined process with guidelines and standards for neighborhood groups to create areas free from cannabis?
September 20, 2021	Hello, I'm a staff person with the North Coast Unified Air Quality Management District, a CEQA responsible agency with jurisdiction over Humboldt, Del Norte, and Trinity Counties. I'd like to correspond with Trinity Co staff and provide input / recommendations for Phase 2 of the General Plan 2050 review process; specifically, with the development of ordinances and regulations. Looking forward to working with you.
